

Tissue Box Cover

You will need:

Sahara Sand Card

Mint Macaron Card

Whisper White Card

Beautiful Blooms DSP

Deco Framelits

Birthday Blooms Stamp Set

Rich Razzleberry/Mint Macaron/Blushing Bride ink

1. Take two pieces of Sahara Sand card measuring $5\frac{3}{4}'' \times 11\frac{3}{4}''$
2. Score on long side ($11\frac{3}{4}''$) at $4\frac{3}{4}''$ and $9\frac{1}{2}''$ Turn and score at 1"
Do this on both pieces. The 1" score line panel is the top of the box.
3. Glue both pieces together gluing the smaller panel of one piece of card to the larger panel of the second piece to create one long strip
4. Burnish and fold on the score lines. Two panels on the box will be stamped and two panels will be layered with card and paper.
5. Cut a panel for the top of the box using Sahara Sand card measuring $4\frac{3}{4}'' \times 4\frac{3}{4}''$
6. Stamp a random pattern using the flower and the dot stamp from Birthday Blooms set on the top panel and on two alternate panels of the box
7. On the other two panels layer card and paper. Use two pieces of Mint Macaron measuring $4\frac{1}{2}'' \times 4\frac{1}{2}''$, two pieces of Whisper White measuring $4\frac{1}{4}'' \times 4\frac{1}{4}''$ and two pieces of pattern paper (DSP) measuring $4'' \times 4''$
8. Cut up each score line from the top edge of the card to the 1" score line, and notch out. This will create four flaps which need to be folded in towards the centre. Glue on each of the corners, gluing the flaps together to create the basic box shape
9. To create lid of box (non-opening) take the $4\frac{3}{4}''$ square top panel and mark the centre. Using small Deco label framelit cut out a shape in the centre.
10. Take a piece of Mint Macaron and create a frame by die cutting two deco label framelits at the same time. This is used to create a frame for the opening where tissues feed through
11. Take a piece of Whisper White card and create a larger frame by die cutting two deco label framelits at the same time. Glue this in place nesting the Mint Macaron frame.
12. The lid can now be glued in place securely
13. Pop over the top of your tissue box to finish!
