

TP Mini Album

You will need:

- | | |
|------------------------------|--------------------|
| Empty Toilet Rolls | Pattern Paper |
| Ribbon | Binder rings/twine |
| Card | |
| Crop o Dile/Large hole punch | |

This is an upcycled project using a minimum amount of supplies to create a mini album using toilet roll inners. Covering the rolls creates an 'album page' with a pocket in the end for a tag. The project can be up-scaled adding a chip board cover, front pockets, envelopes, and embellishments

Instructions

1. Flatten 4 to 6 toilet roll inners using a Big Shot
2. Cover each side of the rolls with double sided tape
3. Measure the flattened roll to find out the length and width
4. Use pattern paper to cover each of the rolls to do this cut paper to size by measuring the Roll length and adding an inch then taking the Roll width x 2 and adding an inch
5. The paper is extended at each end so it can be cut and tucked in, then glued to create a better finish to the 'page'
6. Pockets can also be created by measuring and extending the paper around the roll a second time to the half way mark Remember to glue the sides of the pocket only in this case
7. Create tags for each roll by using plain card and a Tag Topper Punch
8. Reinforce the end of each roll by adding a piece of card cut to measure the width of the roll and up to 1.5" wide which can be border punched for decorative effect

Instructions for Personal Use Only

9. Alternatively rolls can be inked on all four edges top and bottom and paper cut to size to fit the space to create photo and journaling pages
10. There are several ways to bind the album
 - i) Metal bind loops
 - ii) Ribbon
 - iii) Twine
 - iv) Paper hinge system (if creating a cover)
 - v) Commercial binding system
11. Punch two holes either side of the reinforced end of the page. Thread metal loop through each page and close once complete. Check album opens properly. Once bound ribbon and embellishments can be added to the loops and the front cover can be embellished.
